

# Your **GREEN** choice in air conditioning

## **COOL YOUR HOME/OFFICE WITH JARRAHDAL AIR CONDITIONING, PROUDLY WA MADE & OWNED**

Jarrahdale's "Enviro-Tech" Evaporative Air Conditioners are designed to suit Australia's harsh Summer conditions. We are the only company using Fibreglass constructed cabinets to withstand heat distortion from our scorching summer sun and corrosion.

Our design engineers have given the new series a complete make over, introducing new colours and a sleek design to compliment most roofs.

With over 18 years experience and listening to customer feedback, we have improved our unit design with high quality materials and the very latest in electronics. Our newest feature, Humidity Control is a real breakthrough in the evaporative cooling industry, for automatically lowering humidity.

## **COST EFFECTIVE**

Jarrahdale "Enviro-Tech" is up to 80% cheaper to operate compared to ducted reverse cycle systems!! And up to 50% cheaper to install!! Making it one of the most cost effective ways to cool your entire home.

## **HEALTHY FRESH AIR**

Fresh outside air is filtered through the water saturated celdek pads, the air is then cooled by evaporation and circulated through your home by a quiet powerful fan, the old hot stale air is then exchanged outside through open doors and windows. Evaporative air conditioners can achieve up to 35 air changes per hour!!

## **A BREEZE TO OPERATE**

Stylish LCD Touch Control Panel  
Our exclusively designed and manufactured LCD Control panel has many advanced features including:

- Temperature Set Thermostat Control
- Humidity Set Thermostat Control
- 16 Speed Fan Control
- Programmable Water Management
- Pre-Cool Function
- Backlit LCD Screen
- ON/OFF Clock Timer
- Fault Diagnostics
- Optional Remote Control

## **Set and Forget - recommended**

Simply set your desired temperature in auto cool mode and the system will operate automatically at your comfort level.

## **AQUA SMART water management system**

Aqua Smart hygienically treats the system's water, therefore dramatically reducing bacteria and scale build up. Jarrahdale "Enviro-Tech" has several programmable drain intervals which you can choose from the controller. When the system is turned off, Aqua Smart cleverly drains the entire water reservoir, leaving the system clean and dry.

## **CLIMATE SEAL**

The unit has an inbuilt Climate Seal which cleverly opens while the cooler is in operation and closes when the cooler is turned off. This prevents cold air drafts during the Winter months.

## **QUIETNESS DELIVERS COMFORT**

Jarrahdale "Enviro-Tech" uses hush drive motor technology and a Quietflow axial fan. Maintenance Free design with no belts or pulleys to adjust.
