The Clydesdale is our latest and greatest wood heater, unrivalled for burn time and heat output.

Designed with large residences, open-plan living areas and high ceilings in mind, this grand heater can warm up to 350 sq/m with long lasting, permeating heat.

Features include a striking, modern façade with streamline, linear fascia and extended glass panel door for entrancing views of the fire.

\*If installed without a rear-flue shield, the minimum rear wall clearance to combustible is 500mm
